UX & PRODUCT DESIGN

UX RESEARCH · AGILE PRODUCT DEVELOPMENT

ABOUT

UX / Product Designer focused on creating intuitive, user-centered digital experiences. I design digital products by combining user research, interaction design, and usability testing to balance user needs, business goals, and technical feasibility.

Experienced working in **Agile environments**, collaborating with developers, product managers, and stakeholders throughout the full design process. From research and problem definition to user flows, wireframes, prototyping, and design systems.

I am particularly interested in **integrating AI tools into design workflows**, exploring how they can enhance research, ideation, conceptualization, and development to accelerate discovery and improve product innovation.

With a background in UX design and project coordination, I contribute not only to design execution but also to product thinking, requirement definition, and iterative validation to continuously improve digital products.

● UX/UI DESIGN & PRODUCT COORDINATOR

Qbind - 05/2025

- Designed intuitive and engaging user interfaces for web applications, mobile experiences, and internal dashboards.
- Built and maintained scalable design systems to ensure consistency and efficiency across the product.
- Worked closely with developers, product managers, and fellow designers to deliver cohesive and high-quality product experiences.
- Conducted user research and usability testing to inform design decisions and validate product improvements.
- Produced wireframes, interactive prototypes, and detailed design specifications to support smooth and efficient development.
- Acted as a liaison between stakeholders and the development team, clarifying requirements, aligning priorities, and ensuring smooth communication throughout the delivery process.

● PRODUCT DESIGN

EXOGROUP - 09/2022 - 05/2025

- Led the design and delivery of 50+ digital projects, primarily conversion-focused landing pages and marketing assets.
- Worked in fast-paced, Agile workflows delivering small, iterative improvements aimed at increasing user engagement and conversion rates.
- Designed and optimized landing pages and user flows with a strong focus on Conversion Rate Optimization (CRO).
- Collaborated closely with marketing, product, and development teams to rapidly launch and iterate digital campaigns.
- Validated design decisions through A/B testing, performance metrics, and user behavior analysis, continuously refining solutions based on data.
- Coordinated project timelines, requirements, and delivery across multiple stakeholders and teams.
- Translated marketing and business objectives into clear design solutions that improved usability and campaign performance.
