

EDUARDO AGUSTÍ BLASI

UX & UI DESIGNER

PRODUCT MINDSET & AGILE METHODOLOGIES

ABOUT

UX / Product Designer focused on creating intuitive, user-centered digital experiences. I design digital products by combining user research, interaction design, and usability testing to balance user needs, business goals, and technical feasibility.

Experienced working in Agile environments, collaborating with developers, product managers, and stakeholders throughout the full design process. From research and problem definition to user flows, wireframes, prototyping, and design systems.

I am particularly interested in integrating AI tools into design workflows, exploring how they can enhance research, ideation, conceptualization, and development to accelerate discovery and improve product innovation.

With a background in UX design and project coordination, I contribute not only to design execution but also to product thinking, requirement definition, and iterative validation to continuously improve digital products.
